Troy Whistman
Commvault
Tinton Falls, NJ

Dear Troy,

I am writing to express my interest in the Senior Solutions Architect - Databases and Cyber Resilience position at Commvault. Having spent nearly five years at Commvault in the Business Value Consulting (BVC) practice, I bring a combination of institutional knowledge, proven pre-sales execution, technical credibility, and business acumen this role demands.

During my tenure at Commvault, I operated in a dual capacity: elevating the technical and business dimensions of complex enterprise engagements while driving revenue outcomes across the Americas. My work was centered on business case development, and consultative discovery with senior IT and business stakeholders. I consistently achieved or exceeded revenue targets, expanded deal sizes, and contributed to channel partner enablement. These efforts were recognized with the Wingman Award, the Above & Beyond Award, and most recently the Gold Star Award in FY2021Q2.

Beyond the commercial results, I bring a strong technical foundation that has only grown since my time at Commvault. Most recently, I co-lead an AI Ethics workgroup across Fidelity examining the evolution of this technology across multiple dimensions including regulatory, safety, and impact on the environment. I held cloud certifications across AWS (Solutions Architect and Developer Associate), Google Cloud (Professional Cloud Architect), and Microsoft Azure (AI Fundamentals). I have hands-on experience with cloud-native architectures, containerized workloads, and Infrastructure as Code (IaC) as demonstrated with development a virtual lab for Commvault's software-defined storage platform. This technical depth allows me to engage credibly with infrastructure and platform engineers while simultaneously framing business value for the executive audience.

I would welcome the opportunity to discuss how my background aligns with your needs. Thank you for your consideration.

Sincerely,

Eric A. Stephens
